**#EndingAgeismTogether**

If you knew you were going to live to be 100, what would you start learning or doing now?

What is something you've learned from someone of another generation?

Something you'd like to pass on to someone of another generation?

What generational stereotypes or prejudices have you experienced?

What are some things we would like to see in our community that would make it great for people of all ages?

What is something we can do in our own lives to help address ageism?
